

A sustainable company
with focus on people
and environment

SUSTAINABILITY *by* **SUNDSTRÖM**

Caroline Martinsson
Project Leader Sustainability

Sundström Safety has contributed to protecting and improving people's health for almost 100 years. By actively working to develop and enhance sustainability, we also improve environmental and climate impact, working conditions and a cleaner business model with respect for human rights.

At the core of our business are these three values: Openness, Clarity and Respect.

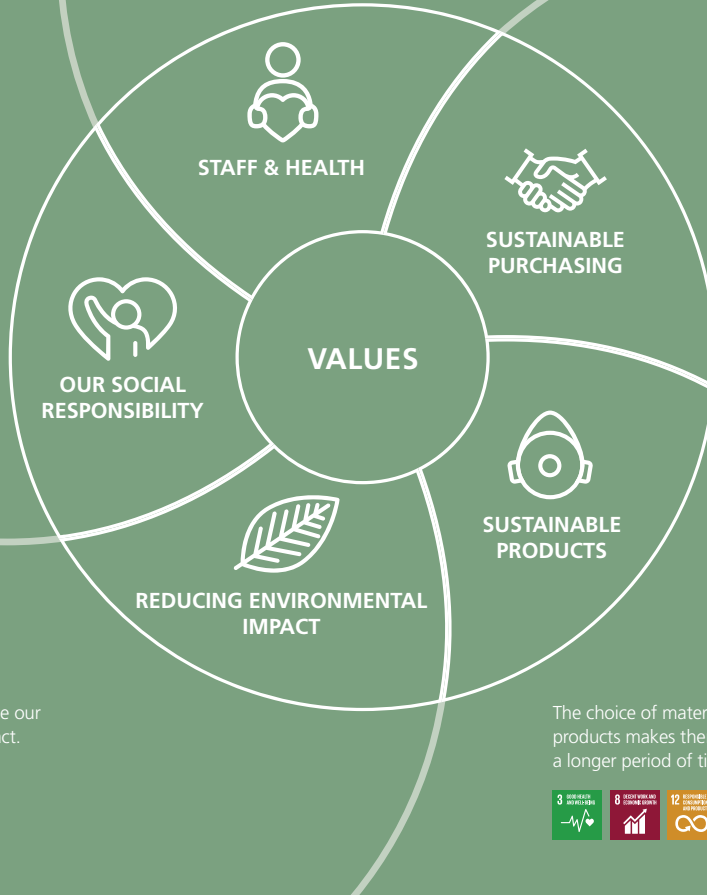

Our employees are one of the company's most important resources.

Protecting people's lives and health has always been our main driving force.

We strive for long-term sustainable relationships with our suppliers.

Our goal is to reduce our environmental impact.

The choice of materials in our products makes them usable for a longer period of time.

Our sustainability wheel

Our five focus areas are: Staff & health, Sustainable purchasing, Sustainable products, Reducing environmental impact and Social responsibility. These are presented as a sustainability wheel with our values at its center.

Our five focus areas are linked to the UN's global goals.
